

ABSTRACT OF THE DISCLOSURE

A rubber composition comprises a blend of butadiene rubber and styrene-butadiene copolymer rubber and contains a mixed filler of carbon black and silica, wherein a resin is compounded in an amount of not less than 4 parts by weight based on 100 parts by weight of a rubber component containing not less than 40% by weight of butadiene rubber and styrene-butadiene copolymer rubber. And also, a tread portion of a pneumatic tire is made from the above rubber composition to simultaneously improve a wet performance and a wear resistance.
